THE NEW EYE NEEDS

Substantial changes in lifestyles and workplaces force our eyes to adapt to new ways of viewing. Mobile phones, PCs, tablets are now inseparable tools of our days, but if they make life easier, allowing us to stay in touch with the world on the other way, they require very stressful performance to our eyes. These are instruments that engage vision in a proximal way, but with the necessity of not losing all that is happening around, so in larger visual fields.

SINGLE VISION AND PROGRESSIVES

The common reading single vision eyeglass, which was considered the only solution in case of eye fatigue in a indoor work situation, may not be enough. The reading lenses, infact, give a good vision only in the close view, but in the case of continue work on the PC, the body will unavoidably pushed **1** forward to better view the contents of the screen. This involves unnatural posture and extreme strain on the back and neck. Likewise, the progressive lenses are also unsuitable, as the intermediate viewing area is designed to be only a channel not suitable for a prolonged session. To see the screen then, we have to go to the near viewing area by lifting the head **2** causing a neck and shoulder fatigue again.

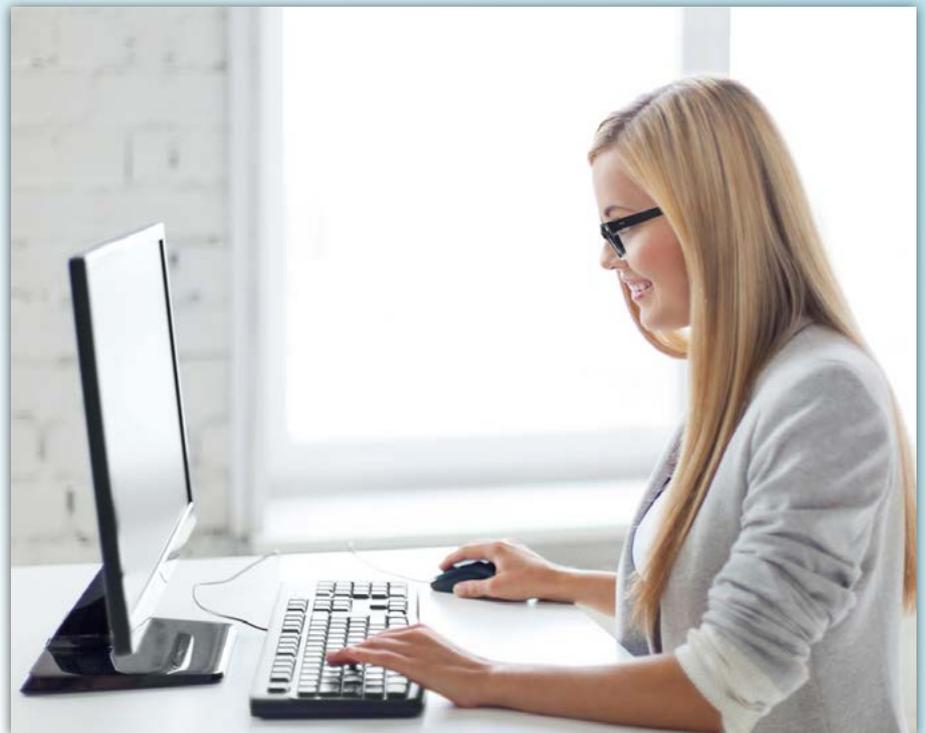

ITAL-LENTI ANSWER: OFFICE

It is now assured that visual comfort contributes significantly to determining the well-being of the entire body. A clear and comfortable vision in near and medium distances facilitates a proper posture for the neck and back for the well being of the wearer.

The Office Itallenti freeform degressive lenses have a digression area that allows the reading in the near and intermediate distances, a necessary condition in the usual office workstations where the vision has to move quickly from computer to sheet on desk. Office lenses are in fact depth vision lenses, providing wide viewing fields that ensure a clear view across the work area, from 40 cm to 3 m.

Compared to traditional reading lenses, the Office degressive lenses help the eye to adapt quickly and naturally.

Due to their particular geometry, Office lenses do not put any limits on the choice of frame: their ultra-slim design, in any degree, allows it to be applied even on minimal design frames.

TWO YEARS GUARANTEE

Ital-Lenti guarantees its lenses for a period of **2 years**. The validity of the warranty is subject to compliance with the following recommendations:

- Protect your glasses and cleaning cloth from dust and weathering.
- Do not leave your glasses under sunlight for a long time (eg on the car dashboard or on the window sill).
- Always use a microfibre cloth to clean the lenses.
- Do not rest your glasses with the lenses facing down.
- Avoid contact with aggressive substances such as hispiracy, acetone, etc.
